Preventing Homelessness Is the Best Way to Help End Homelessness

Rents and prices have risen, putting more people at risk of homelessness. More people had to be turned away last year than ever before due to a temporary lack of funding. Your donations can help change that!

- It's cost effective, costing on average just \$1,150 to keep a family housed; \$500/person
- It's humane, as it avoids the trauma of homelessness and the downward spiral that too often results
- 50% of people who are homeless in any given year are homeless for the first time

Help is needed now more than ever!
